

Collaborating Institutions

As a research centre of excellence, the CNIO has the responsibility to disseminate scientific knowledge to research and clinical communities worldwide. Over 144 material transfer agreements (MTAs) were entered with research groups belonging to a host of public research institutions and universities, as well as with some private companies in 2010. Moreover, the CNIO was involved in more than 600 collaborations since its creation. Below is a list of our collaborations in 2010.
