One of the elements that contribute to the international projection of the CNIO is the commitment of our established investigators to foster new generations of scientists. In fact, over 60% of the work force at our institution comprises young researchers, including undergraduate students, predoctoral and postdoctoral fellows, medical residents and a broad spectrum of visiting scientists. As such, the CNIO dedicates particular emphasis to career development, supported in part by highly competitive PhD and postdoctoral programmes. Agreements are also in place with multiple universities and medical centres, to ultimately bridge the gap between academic and clinical environments. We are also most grateful to the medical centres, to the society at large.

Agreements are also in place with multiple universities and medical centres, to ultimately bridge the gap between academic and clinical environments. We are also most grateful to the medical centres, to the society at large.
