EDUCATION AND TRAINING PROGRAMMES

One of the principal goals of the CNIO is to increase its training capacity in order to give students and professionals the opportunity to advance their careers in the healthcare sector.

The CNIO obtains essential grants to train new professionals and attracts funds to hire personnel-in-training. Coordinating specific training programmes, establishing collaborations with different universities and institutions, and managing grant funding and training contracts to hire personnel-in-training are fundamental to guarantee the training of new researchers and the continuity of high-level research projects.

During 2023, the CNIO obtained funding to hire personnel-in-training from several national and international public institutions such as the State Research Agency of the Spanish Ministry of Science, Innovation and Universities (AEI/MCIU), the Community of Madrid, the Institute of Health Carlos III, China Scholarship Council, and the European Research Council, most of them co-funded by European Structural and Investment Funds. Funding also came from private funders, including the Spanish Association Against Cancer (AECC), “la Caixa” Banking Foundation, and the Cris Foundation.

In addition, in 2023, the CNIO signed several new agreements with Spanish Universities and other institutions, namely with the Universidad de Jaén, IES José Luis Sanpedro, IES Rosa Chacel, IES Leonardo Da Vinci, Centro Educativo ILERNA, and Centro Superior CEAC de Formación Profesional.

TRAINING OF BSC/MSC STUDENTS

The CNIO is committed to training junior scientists at the onset of their careers. To this end, the Centre has established a Programme that offers BSc and MSc students the opportunity to obtain hands-on practical laboratory experience by working on ongoing research projects in one of the CNIO Groups. The CNIO offers 2 types of short-term laboratory training:

- An annual Summer Training Programme for undergraduate students, from any country, who are in their last years of study in the biomedical field. The Programme encompasses 8 weeks of full-time laboratory training (292.5 hours). During this time, the students actively participate in research projects in one of the CNIO Groups. During 2023, 4 students from Spain participated in this programme.

- Additionally, students can apply for laboratory training throughout the academic year by directly contacting the Heads of CNIO’s individual Research Groups or Units. This year, 115 students participated in these programmes, of whom 5 ended up joining the CNIO as pre-doctoral students.

The training of PhD students in cutting-edge cancer research is of key importance to the CNIO. The Centre offers many opportunities for bright and dynamic university graduates, of all nationalities, to pursue an ambitious PhD project. To attest this, 16 students obtained their PhD degrees in 2023 and 27 others joined the CNIO in the same year. Over 15% of the students working at the CNIO in 2023 were graduates from foreign universities, thus contributing to the internationalisation of the Centre.

Since 2008, the “la Caixa” Foundation offers international fellowships to PhD students to enable them to carry out their thesis projects in biomedical research in Spanish centres of excellence, such as the CNIO. During 2023, 3 pre-doctoral students received a doctoral fellowship from the INPhINIT excellence, such as the CNIO. During 2023, 3 pre-doctoral fellowships to PhD students to enable them to carry out their research projects at the forefront of cancer research.

One of the CNIO’s prime objectives is to attract young researchers, who have recently obtained their PhD or MD degrees, and to offer them highly attractive research projects at the forefront of cancer research.

In 2023, 37 postdoctoral fellows worked at the CNIO. Notably, about one fourth of these fellows were from outside of Spain, many coming from very prestigious international institutions. Thanks to the donations received through the ‘CNIO Friends’ platform, the 8th call of the ‘CNIO Friends’ Postdoctoral Contract Programme, launched in 2023, resulted in the recruitment of 3 scientists for a 2-year period each.

The distribution of students across the CNIO’s Research Programmes in 2023 was as follows: 46% of students worked in the Molecular Oncology Programme, 16% in the Experimental Therapeutics Programme, 6% in the Structural Programme, 9% in the Clinical Programme, 11% in the Biotechnology Programme, and 16% in the Clinical Programme.
In addition, the CNIO – in collaboration with academic institutions across Spain – provides access to a variety of postgraduate programmes that cover the areas of Cellular & Molecular Biology, Molecular Biomedicine, Biotechnology, Biocomputing, Clinical & Applied Cancer Research, and Therapeutic Targets. The majority of the international postgraduate trainings offered at the CNIO are developed in collaboration with the Faculty of Medicine and Faculty of Sciences at the Autonomous University of Madrid (UAM). These trainings fall under 4 official Postgraduate Programmes, namely, the Doctorate in Molecular Biosciences, Master’s in Biomolecules & Cell Dynamics, Master’s in Molecular Biomedicine, and Master’s in Biotechnology. CNIO also collaborates with the UAM as a partner institution of UAM’s Doctoral School (EDUAM) and is a member of the Management Committee.

Official Master’s Degree in Clinical and Applied Cancer Research

The CNIO and the CEU-San Pablo University in Madrid (USP-CEU) co-organise a Postgraduate Training Programme in Clinical and Applied Cancer Research: the Máster Universitario en Investigación Clínica y Aplicada en Oncología.

Master’s Degree in Biocomputing Applied to Personalised Medicine and Health

The Master’s in Bioinformática Aplicada a la Medicina Personalizada y la Salud is organised together with the National School of Health of the National Institute of Health Carlos III (Escuela Nacional de Sanidad del Instituto de Salud Carlos III, ENS-ISCIII).

Official Master’s Degree in Therapeutic Targets of Cell Signalling: Research and Development

The CNIO collaborates with the Biochemistry and Molecular Biology Department at the University of Alcalá de Henares (UAH) for the Máster Oficial en Dianas Terapéuticas en Señalización Celular: Investigación y Desarrollo.

LABORATORY TRAINING FOR TECHNICIANS

This training programme has been developed for students in Anatomical Pathology, Clinical Diagnostic Laboratory, and Archiving/Recording, it is organised through agreements with 19 institutions that provide secondary education for laboratory technicians in Spain. It provides students with hands-on training.

POSTGRADUATE PROGRAMMES

In addition, the CNIO – in collaboration with academic institutions across Spain – provides access to a variety of postgraduate programmes that cover the areas of Cellular & Molecular Biology, Molecular Biomedicine, Biotechnology, Biocomputing, Clinical & Applied Cancer Research, and Therapeutic Targets.

Official Postgraduate Programmes in Molecular Biosciences

The majority of the international postgraduate trainings offered at the CNIO are developed in collaboration with the Faculty of Medicine and Faculty of Sciences at the Autonomous University of Madrid (UAM). These trainings fall under 4 official Postgraduate Programmes, namely, the Doctorate in Molecular Biosciences, Master’s in Biomolecules & Cell Dynamics, Master’s in Molecular Biomedicine, and Master’s in Biotechnology. CNIO also collaborates with the UAM as a partner institution of UAM’s Doctoral School (EDUAM) and is a member of the Management Committee.

LABORATORY TRAINING FOR TECHNICIANS

This training programme has been developed for students in Anatomical Pathology, Clinical Diagnostic Laboratory, and Archiving/Recording, it is organised through agreements with 19 institutions that provide secondary education for laboratory technicians in Spain. It provides students with hands-on training.

TRAINING FOR MDs

In line with CNIO’s commitment to bridge the ‘bench to bedside’ gap, the Centre offers 3 training opportunity programmes to MDs and other health care professionals. Training usually consists of a 3-month period during residency. In 2023, 9 medical residents from 5 different hospitals enjoyed the benefits of rotations within the different Groups and Units at the CNIO.

ADVANCED TRAINING OF SCIENTISTS THROUGH EXTRAMURAL PROGRAMMES

During 2023, the Ramón y Cajal Programme supported 5 scientists. This special initiative, established in 2001 by the former Spanish Ministry of Science and Technology (currently the State Research Agency of the Spanish Ministry of Science, Innovation and Universities) aims to encourage Spanish or foreign scientists working abroad to return to or relocate to Spain. Successful candidates are selected on the basis of their potential capacity to lead independent projects and groups, or to contribute successfully to the ongoing research in the existing groups.

VISITING RESEARCHERS PROGRAMME

The Fundación Jesús Sierra, now Fundación Occident, aims to help eminent international specialists work together with CNIO researchers for a few months in order for them to expand their knowledge in areas of common interest. During 2023, Gonçalo Bernardes, from the University of Cambridge (UK), was beneficiary of the Jesús Sierra Foundation’s Visiting Researchers Programme.

‘SCIENCE BY WOMEN’ PROGRAMME

Thanks to the ‘Science by Women’ Programme, launched by the Spanish “Fundación Mujeres por África”, Marwa Muhammad Abu-Serie Ali, from GEBRI, SRTA-City (Alexandria, Egypt), was awarded a grant to join the CNIO’s Genetic and Molecular Epidemiology Group for a 6-month stay as a visiting scientist.

During 2023, thanks to this Programme, we also had the pleasure of hosting Ngozi Justina Nwodo, from the University of Nigeria, and Mai Fathy Bayomi Tolba, from Ain Shams University (Cairo, Egypt), for a 6-month stay as visiting scientists in the CNIO’s Medical Chemistry Section and the Breast Cancer Clinical Research Unit, respectively.
